Trace Properties

General Events Selection

Review selected events and event columns to trace. To see a complete list, select the "Show all events" and "Show all columns" buttons.

1 CREATE TRIGGER reminder1  
2 ON Sales.Customer  
3 AFTER INSERT, UPDATE  
4 AS RAISERROR ('Notify Customer Relations', 16, 10);  
5 GO

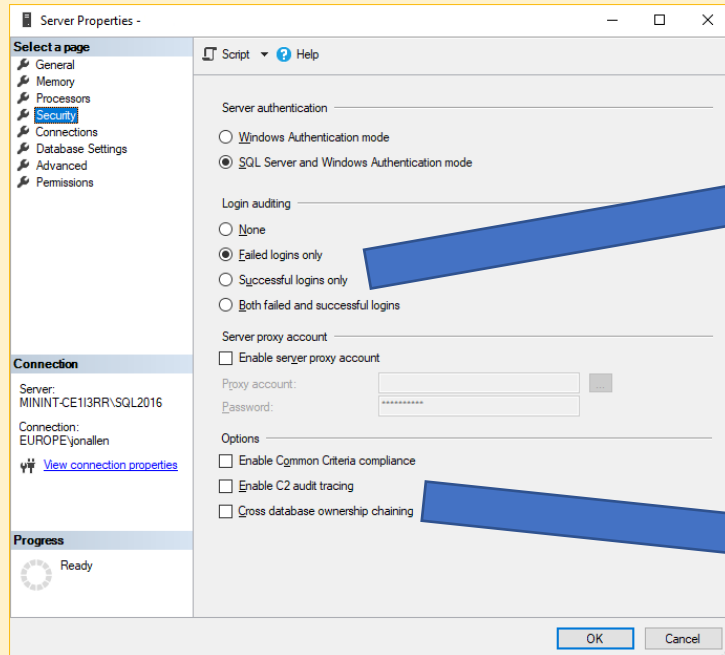

Event Class	Event Name	Schema	Column	Event Class	Event Name	Schema	Column
<input type="checkbox"/>	Audit App Role Change Password Ev...			<input type="checkbox"/>			
<input type="checkbox"/>	Audit Backup/Restore Event			<input type="checkbox"/>			
<input type="checkbox"/>	Audit Broker Conversation			<input type="checkbox"/>			
<input type="checkbox"/>	Audit Broker Login			<input type="checkbox"/>			
<input type="checkbox"/>	Audit Change Audit Event			<input type="checkbox"/>			
<input type="checkbox"/>	Audit Change Database Owner			<input type="checkbox"/>			

Enable C2 audit tracing  
Cross database ownership chaining

Progress

# Auditing SQL Server

## Default login auditing

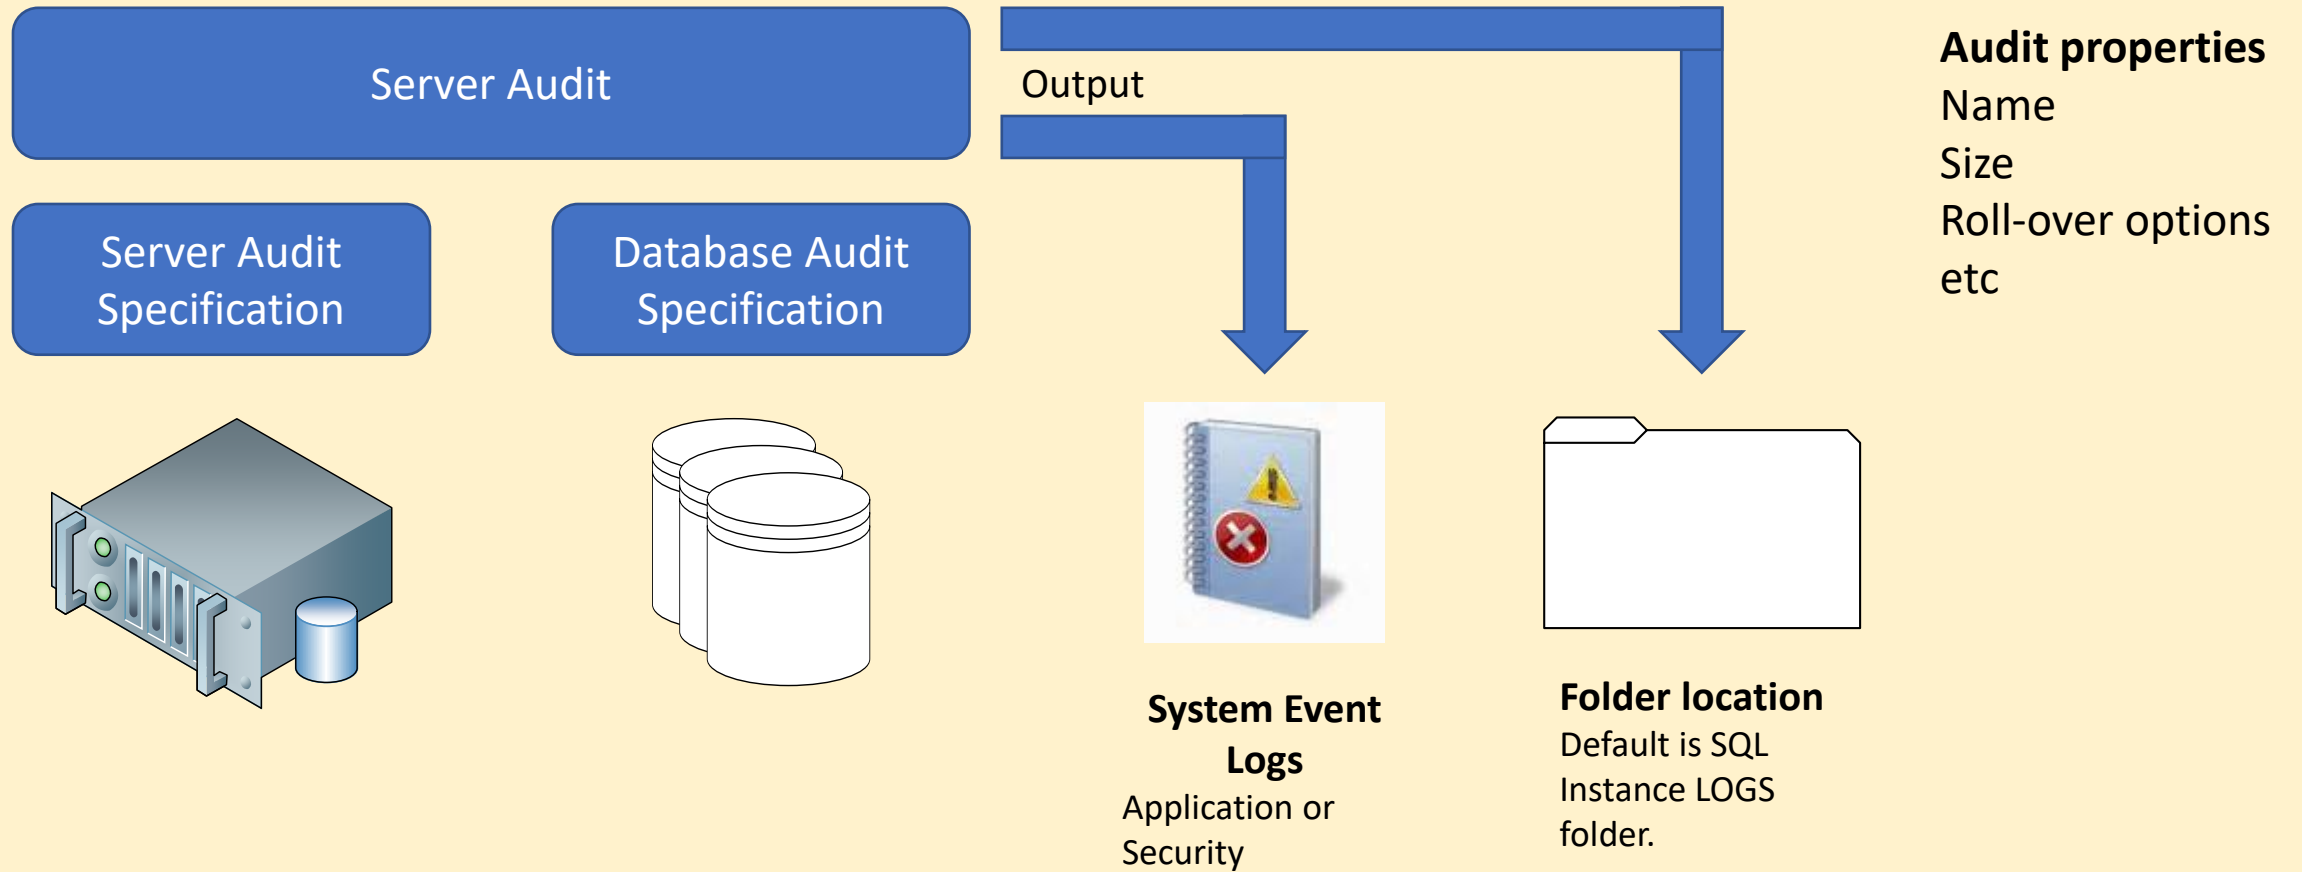

Login auditing

- ☐ None
- ☒ Failed logins only
- ☐ Successful logins only
- ☐ Both failed and successful logins

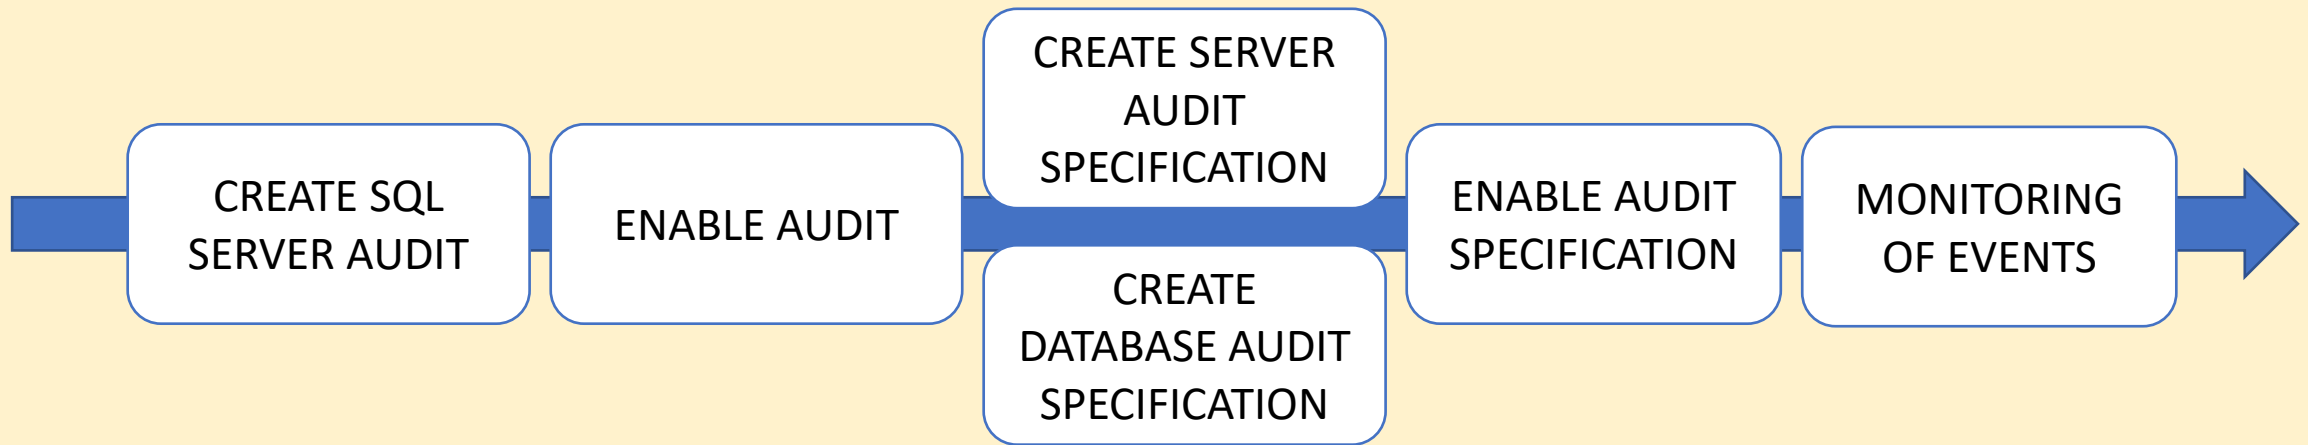

Options

- ☐ Enable Common Criteria compliance
- ☐ Enable C2 audit tracing
- ☐ Cross database ownership chaining

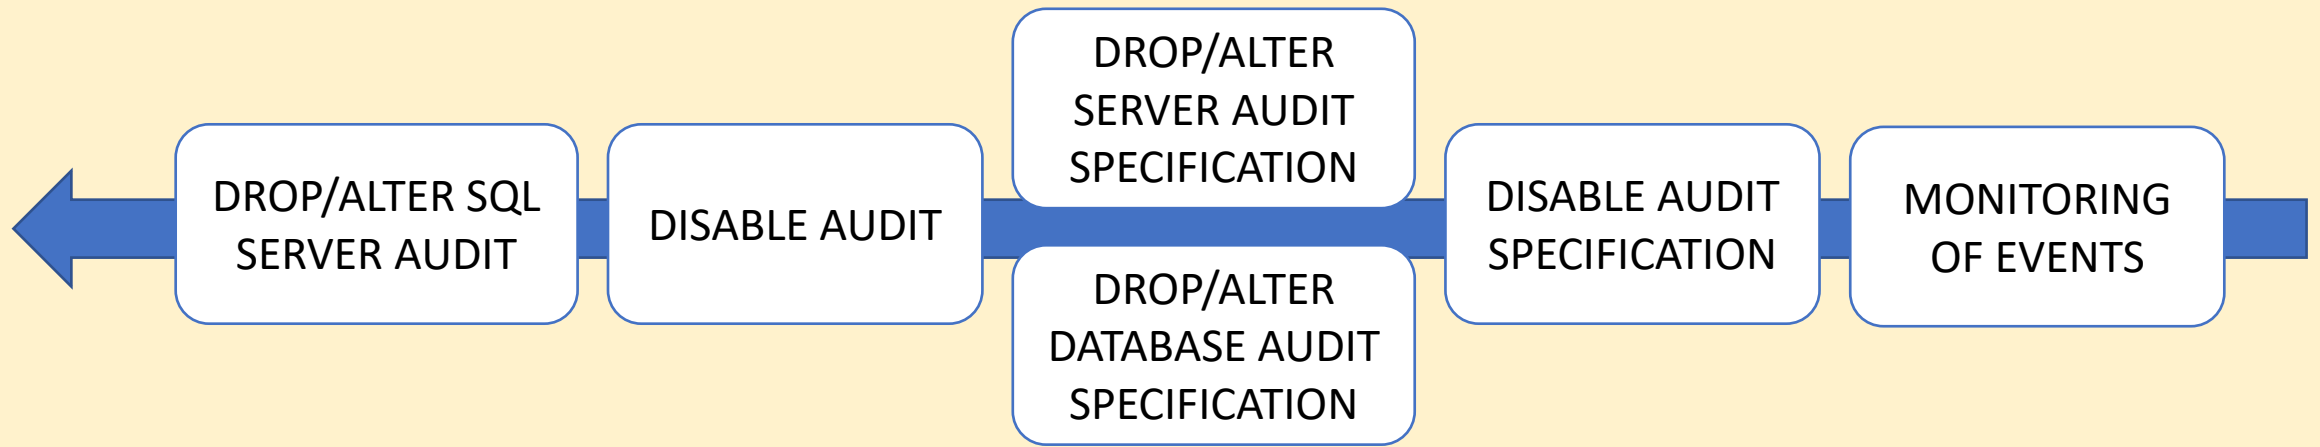

# SQL Server – Server and Database Audits

# SQL Server Audit – creation workflow

# SQL Server Audit – Drop/Alter workflow

Demo

# So why SQL Server Audit?

## For

- GUI for setup and management
- Easy to recreate via TSQL
- Very configurable
- Great for security
- Little/Zero penalty for usage

## Against

- Can collect a lot of information
- Can have a severe effect on your server availability if you choose Stop Service option
- Can get complex to be very specific on event filter

# Sponsors

*Thank you!*  
*We couldn't do it without you.*
